ABU - Uruguay, as headquarters of COLABIOCLI proposes for this period the following:

- 1. Intensive technical growth of the Lab professionals
- 2. Improving the service the Lab offers
- 3. Continuous International Agreements
- 4. Review Internal Vision

Intensive technical growth of the Lab professionals

- Stimulating permanent training, maintaining and promoting Distance Learning Courses
- Programming Exchange Scholarships for Clinicians.
- Strengthening the Lab Staff by promoting the unification of curricula and accreditation courses
- Reevaluating the work at the Clinic Lab, through diagnosis, and tackling the problems in the different countries.

Improving the service the Lab offers

- *Stimulate Latin American Cooperation to help the Labs progress
- *Promote and encourage *Neonatal Screening* in all Latin American countries stimulating prevention
- *Create a *Catalog of Latin American Experts* to organize technical advice
- *Guidance and advice in the field of *Bioethics*
- *Promote the *Standardization of Creatinine* for all Latin America
- *Implement a system to *Buy Lyophilised Sera* for the entire region
- *Promote and stimulate *Accreditations of Clinical Labs*

In respect to International Agreements

- We will continue with the *agreement* COLABIOCLI-OPS in the area of quality
- We will continue performing joint activities with IFCC to stimulate mutual growth

Internal Vision

- We would be very interesting if we can improve our inner organization
- We have thought of evaluating the present statute to update it
- Studying the possibility of creating a fixed secretariat to facilitate the management of the Confederation
- And updating and giving more diffusion of our web page
