

3. GREETINGS FROM THE NEW IFCC PRESIDENT

PROF. TOMRIS OZBEN

Prof. Dr. Tomris Ozben
IFCC President 2024 – 2026
IFCC President elect 2023

Estimados colegas, queridos amigos,

Ha sido un inmenso privilegio y honor para mí observar cómo la IFCC se está convirtiendo en una Federación fuerte y poderosa durante mis varios años de servicio en la IFCC. Ahora, estamos celebrando los 70 años de su fundación. Las Juntas Ejecutivas de la IFCC pasadas y actuales y los funcionarios de la IFCC han construido la estructura de la IFCC, definiendo reglas y procedimientos internos, logrando el reconocimiento legal de la IFCC, asegurando la sostenibilidad financiera y construyendo puentes eficientes con las Federaciones Regionales de la IFCC, las Sociedades Nacionales y otras asociaciones internacionales activas en el campo de la medicina de laboratorio. Todos ellos merecen nuestra máxima admiración por su trabajo voluntario, conocimiento, entusiasmo y buen espíritu que han actuado como valiosos pilares para la creciente Federación que sirve a sus miembros y proporciona un verdadero liderazgo mundial en medicina de laboratorio. Personalmente, como futuro presidente electo de la IFCC y en nombre de la Federación Europea de Química Clínica y Medicina de Laboratorio (EFLM), le deseo muchos años de éxito a la IFCC.

Dear Colleagues, Dear Friends,

It has been an immense privilege and honor for me to observe how IFCC is growing into a strong and powerful Federation during my several years of service to IFCC. Now, we are celebrating its 70 years anniversary of her foundation. Past and present IFCC Executive Boards and IFCC officers have built the structure of IFCC, defining internal rules and procedures, achieving legal recognition of IFCC, ensuring financial sustainability, and building efficient bridges with IFCC Regional Federations, National societies, and other international associations active in the field of laboratory medicine. They deserve our utmost admiration for their voluntary work, knowledge, enthusiasm, and good spirit which have acted as precious building blocks for the growing Federation which serves its members and provides a true global leadership in laboratory medicine. Personally, as the future IFCC President-elect and on behalf of the European Federation of Clinical Chemistry and Laboratory Medicine (EFLM), and I wish many successful years to IFCC.

Prof. Dr. Tomris Ozben,

EuSpLM, Ph.D., D.Sci., Specialist in Clinical Biochemistry
Full Professor of Biochemistry and Clinical Chemistry
Akdeniz University, Medical Faculty, Dept. of Clinical Biochemistry, Antalya Turkey
University of Modena and Reggio Emilia, Medical Faculty, Clinical and Experimental Medicine, Modena, Italy
University of Zimbabwe, College of Health Sciences, Chemical Pathology, External Examiner, Harare, Zimbabwe
Slovak Society of Clinical Biochemistry (SSCB), Honorary Member
EFLM, President
EFLM Task Force-Green Labs, Chair
IFCC, Executive Board Member, EFLM Representative
